

# Used Oil Recycling in Grant Parish

*If all the used oil in the United States were recycled in a single year we would save half the output of the Alaska Pipeline for the same period.....over one billion gallons!*

**Where can you recycle your used oil?**

**Village of Georgetown**  
**4570 Hwy. 500**  
**Georgetown, Louisiana**  
**318-827-5527**

**Be certain oil is NOT mixed with water or other substances! Call for details on quantities accepted.**

---

## **Some Dos and Don'ts:**

- ✘ NEVER dispose of used motor oil on the ground, in a ditch, creek, river, or lake, in a storm drain, or in the garbage.
- ✘ Do NOT mix used motor oil with anything else, such as gasoline, solvents, antifreeze, or water.
- ✓ Transfer your used motor oil to a clean leak-proof plastic container with a screw on top (milk jug, empty oil container, etc.) and put the top on firmly to prevent leaking or spilling.
- ✓ Prior to discarding your used oil filter, punch an air hole in the dome end of the filter. You may use a screwdriver, but be careful not to puncture your hand. Also, puncture the anti-drain back valve (if present) located at the flat end of the filter. Allow oil to drain from the filter and combine it with the rest of your used motor oil for recycling.
